

CHEMICALS

KEEP YOUR CHEMICAL DATA UP TO DATE WITH OUR SIMPLE, CUSTOMISABLE, MANAGEMENT SYSTEM.

MAIN DESCRIPTION:

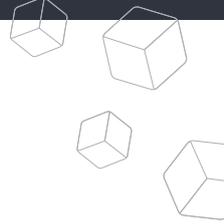

Ensuring your employees have the most up to date information regarding chemicals in use and ensuring you are tracking all chemicals on site can be difficult. Effective's Chemical Inventory module provides a

central storage location for all chemical data, including Safety Data Sheets (SDS) and Chemical Risk Assessments, supplier data, and storage / usage information.

KEY FEATURES:

- > All chemical information is captured in one module; and can be shared across the organisation.
- > Attach safety data sheets and risk assessments associated with the chemical.
- > Record and track monthly chemical usage across multiple sites.
- > Store and record important supplier contact information.
- > R Phrase Classifications and GHS Classifications built in.
- > Integrated with other Effective modules to ensure your solution saves time and removes duplication.
- > Filter tool helps quickly locate the chemical required.

BENEFITS:

CHEMICALS

INTEGRATION

We're an integrated solution where information can freely flow from module to module without duplicating work. Your chemical data records can be easily accessed in order to complete effective CoSHH assessments.

ACCESSIBILITY

All your chemical data can be kept and tracked in one place. With centralised tracking, our system simply allows key users to access MSDS and hazard information through to Supplier contact details with a click of a button.

SPEED

Once the chemical information is entered in the system, it's held indefinitely. Key users can check and update all information when required so there is no need to re-create or search out the information.

COMPREHENSIVE MODULE OFFERING

Chemicals is just one of 19 product modules that are available. Whatever your industry sector, whatever your challenge, Effective's comprehensive range of product modules is sure to provide you with the tools to streamline your entire health and safety procedures.
